PROFESSIONAL SUMMARY

Software Engineer and Data Analyst with hands-on experience in Python, machine learning, and Generative AI. Passionate about large language models, artificial intelligence, and data science. Built end-to-end ML pipelines and AI-powered web applications. Quick learner with strong problem-solving skills and experience collaborating in team-based, deadline-driven environments. Familiar with agile workflows and version control.

TECHNICAL SKILLS

Languages:	Python, SQL, C/C++ (fundamentals), JavaScript (basics)
AI / ML:	PyTorch, Scikit-learn, Large Language Models (LLMs), Generative AI, Random Forest, SVM, Decision Tree
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Tools & Platforms:	Power BI, Excel, Flask, VS Code, Jupyter Notebook, GitHub, Azure (familiar)
Concepts:	Machine Learning Pipelines, Data Cleaning & Visualization, CI/CD awareness, Agile Practices

PROJECTS

Precision Farming: AI-Powered Crop Recommendation System

Python · Random Forest · Flask · Scikit-learn · Machine Learning Pipeline | 2026

- Developed an ML-based crop recommendation system using Python and Random Forest, achieving ~90% prediction accuracy on 5,000+ agricultural records.
- Built and evaluated complete ML pipeline including data preprocessing, feature scaling, model training, and performance evaluation — directly aligned with AI/ML engineering best practices.
- Compared multiple algorithms (Decision Tree, SVM, Random Forest) and selected Random Forest for superior accuracy and reduced overfitting, demonstrating analytical rigor.
- Deployed model via a Flask web application enabling real-time user interaction with soil, rainfall, and temperature inputs — showcasing full-stack AI deployment skills.

Low-Bandwidth Virtual Classroom Solution (Smart India Hackathon 2025)

Edtech · System Design · Agile Collaboration | 2025

- Designed a scalable virtual classroom solution for rural colleges with limited bandwidth, demonstrating skills in distributed systems thinking and real-world constraints.
- Collaborated in a team under tight hackathon deadlines, applying agile problem-solving, task allocation, and iterative delivery practices.
- Presented solution to a national panel of judges, demonstrating technical depth and communication skills with diverse stakeholders.

KEY ACHIEVEMENTS

3rd Place – GenAI Forge 2026 National Hackathon (SmartBridge × NASSCOM FutureSkills Prime)

- Led a team to design and deliver an AI-powered web application using Generative AI to address real-world industry problems at a national level.
- Managed task allocation and project delivery within tight deadlines, demonstrating leadership and cross-functional collaboration.
- Presented scalable GenAI solution to industry judges — showcasing communication and ability to articulate complex AI concepts clearly.

Smart India Hackathon 2025 – Institutional Selection

- Selected to represent Siddhartha Institute of Engineering & Technology at one of India's largest national hackathons.

EDUCATION

B.Tech – Computer Science Engineering (AI & Machine Learning)

Siddhartha Institute of Engineering and Technology, Telangana | Expected April 2027 | CGPA: 8.55/10

Intermediate – MPC

Narendra Cooperative Junior College | CGPA: 90.1/100

SSC

Sri Suryodaya High School | CGPA: 10/10

CERTIFICATIONS

- Python Programming Course – GeeksforGeeks
- Master Data Analysis with Python – Udemy
- The Complete MySQL Bootcamp – Udemy
